

The firmware version of the mecablitz 44 AF-1 digital can be read directly from the flash unit. Hold down the TTL button on the flash unit while pressing the ON-button. On the flash unit, the M button and the LED for partial light output 1/1 and 1/64 will flash. The number of flashes shows the firmware version e. g. 1/1 LED flashes once and the 1/64 LED 3 times to install firmware version 1.3.
