

# Huelight Camera Profiles

Huelight camera profiles have been designed for use with Adobe Camera Raw and the Adobe Lightroom.

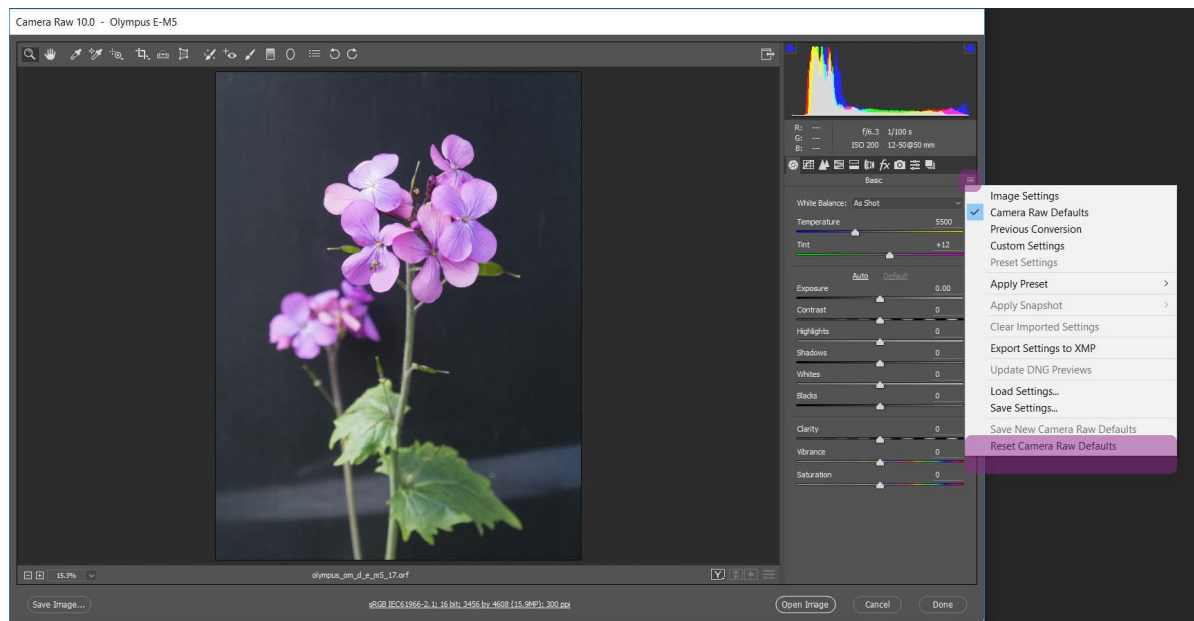

The camera profiles are compatible with Photoshop CS6 (ACR 7) and CC (ACR 8,9,10 & 11) and Lightroom version 5,6 & CC.

## Quick Start Guide

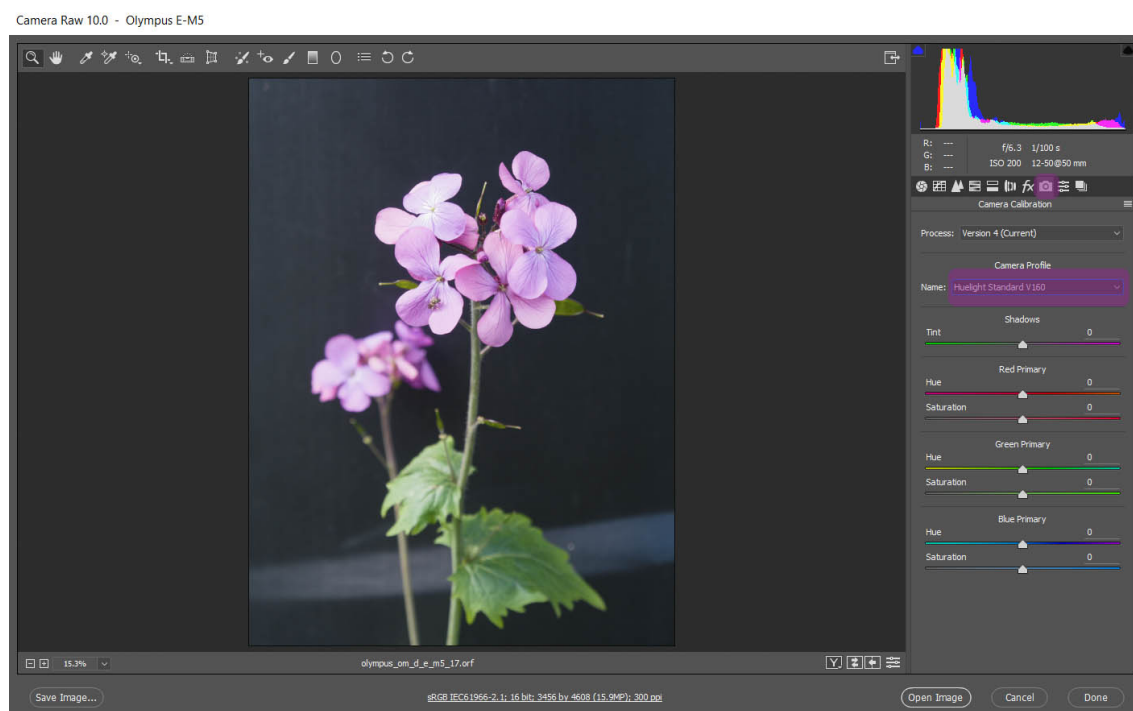

Start Lightroom or Photoshop, and open a RAW file.

### Adobe Photoshop

In the Adobe Camera Raw (ACR) window, click on the drop down menu highlighted below and click **"Reset Camera Raw Defaults"**:

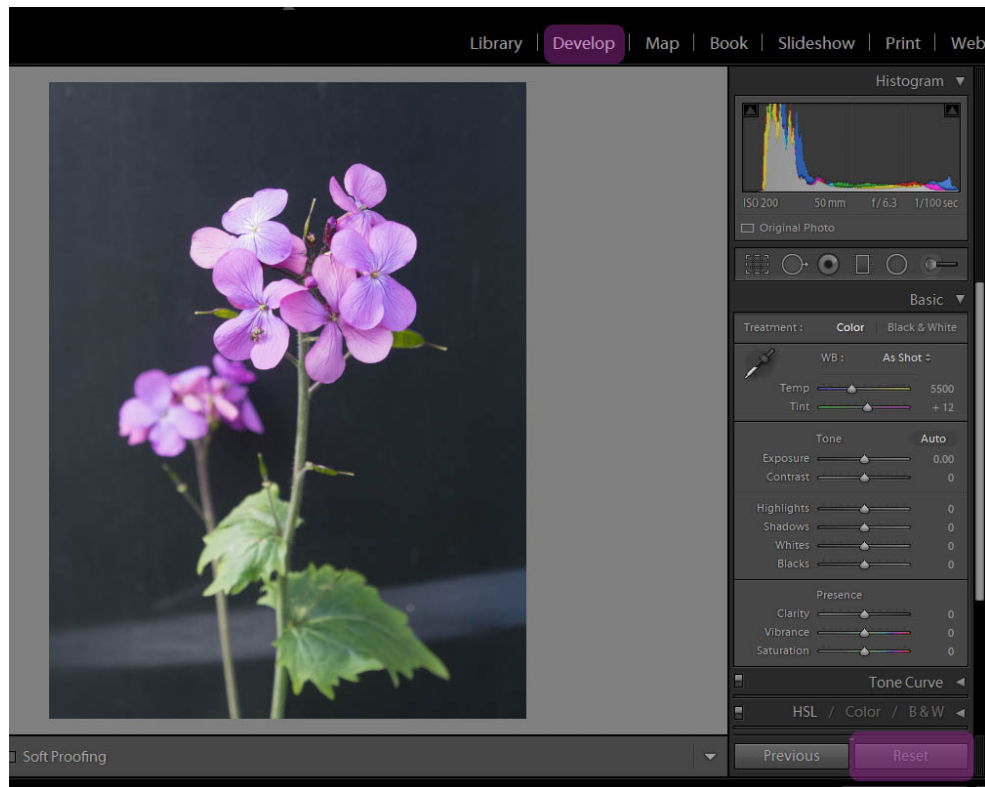

Click the **"Camera Calibration"** tab and select the **"Huelight ..."** camera profile from the drop-down menu:

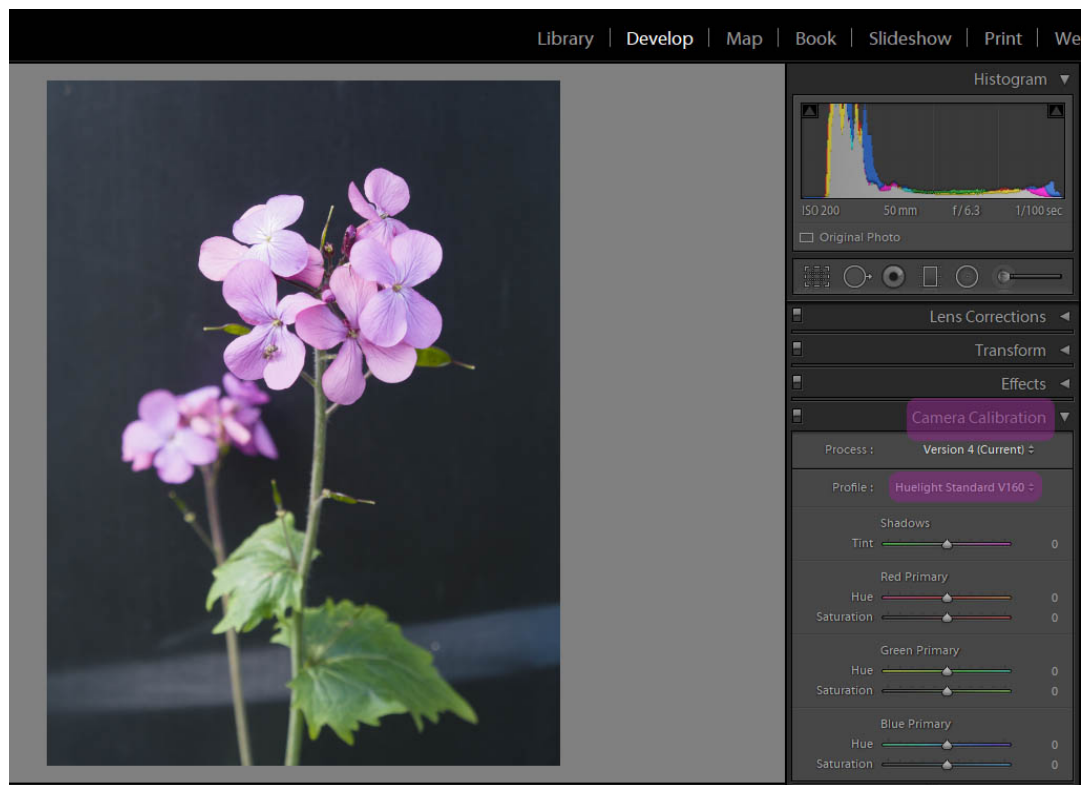

The profile is now applied.

## Adobe Lightroom

Select the **“Develop”** module and click **“Reset”** as highlighted below:

Expand the **"Camera Calibration"** tab, and in the profile drop down menu select the **"Huelight ..."** profile:

The profile is now applied.

## The Profiles

The four profiles supplied are designed for the following purposes: -

### **Huelight Neutral**

This profile is ideal for scenes that requires a lower contrast.

### **Huelight Standard**

General-purpose profiles, suitable for all scenes.

### **Huelight Landscape**

Achieves a vibrant and lively atmosphere, whilst projecting a deep and rich colour tone.

### **Huelight Portrait**

This profile is particularly well-suited for shooting women and children.
